Supervised Machine Learning:
Regression and Classification
Advanced Learning Algorithms

Sanjeev Kumar

AI Engineer | Building LLM Applications, AI Agents & ML Systems |
Python • FastAPI • LangChain • AWS • Docker • n8n | DTU'26
Rohini, Delhi, India

Summary

I'm a final-year Computer Science student at Delhi Technological University (DTU) with a strong interest in Machine Learning, Large Language Models (LLMs), and AI-powered software systems.

My experience spans training data quality, model evaluation, RLHF workflows, prompt engineering, and building end-to-end machine learning applications. Through hands-on work with LLM pipelines, I've developed an understanding of how modern AI systems behave, where they fail, and how to improve their performance through better data, evaluation, and engineering practices.

I regularly work with Python, C++, PyTorch, Scikit-learn, Hugging Face Transformers, and modern cloud-native tools to build projects involving NLP, deep learning, recommendation systems, AI agents, and automation workflows. Beyond model development, I enjoy designing reliable ML pipelines, deploying applications, and turning research ideas into practical solutions.

My interests lie at the intersection of AI, software engineering, and automation, particularly in building intelligent systems that can scale from experimentation to production.

I'm currently seeking full-time and internship opportunities in Machine Learning Engineering, AI Engineering, Data Engineering, and Software Engineering, where I can contribute to building impactful AI products while continuing to grow as an engineer.

Technical Skills:- Python, C++, SQL, PyTorch, Scikit-learn, Hugging Face Transformers, LangChain, Docker, Kubernetes, AWS, Git, n8n, Machine Learning, Deep Learning, NLP, LLM Evaluation, Prompt Engineering, RLHF, AI Agents, Workflow Automation

Open to:- On-site (Delhi, Bengaluru, Hyderabad) | Remote

Experience

Outlier

AI Trainer

February 2026 - April 2026 (3 months)

Remote

- Worked as a freelance AI Trainer, evaluating and improving responses generated by large language models (LLMs) for code, math, and reasoning tasks.
- Reviewed and ranked AI-generated outputs based on accuracy, relevance, and quality to improve model performance through RLHF (Reinforcement Learning from Human Feedback).
- Wrote and validated Python and C++ code solutions, ensuring correctness and efficiency for AI training datasets.
- Contributed to prompt engineering and data labeling tasks to enhance LLM capabilities across multiple domains.

Education

Delhi Technological University (Formerly DCE)

Bachelor of Technology - BTech, Computer Science, Minor in ML · (November 2022 - June 2026)

Delhi College of Engineering

Bachelor of Technology - BTech · (November 2022 - June 2026)

Yuvashakti Model School

· (2018 - 2022)
